**Description of Business** (continued)

These consolidated financial statements have been prepared on a going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. As at April 30, 2016, the Company has not generated any revenues from operations, has an accumulated deficit of \$24,410,298, and has a working capital deficit of \$1,759,783. The continued operations of the Company are dependent on its ability to generate future cash flows or obtain additional financing. Management is of the opinion that it has sufficient working capital to meet the Company's liabilities and commitments as they become due, although there is a risk that additional financing may be required but will not be available on a timely basis or on terms acceptable to the Company. These factors indicate the existence of a material uncertainty that may cast significant doubt upon the Company's ability to continue as a going concern. These financial statements do not reflect any adjustments that may be necessary if the Company is unable to continue as a going concern.

(a) Mountain of Gold, Ontario

Pursuant to a mineral property option agreement dated May 4, 2005, the Company was granted an option to acquire a 100% undivided interest in two claims in the Turnbull area of Ontario. In order to keep the option granted to the Company in good standing, the Company was obligated to:

- i) issue 50,000 common shares on regulatory approval of the agreement;
- ii) issue 50,000 common shares by May 4, 2006; and
- iii) issue 100,000 common shares by May 4, 2007.

The Company has earned a 100% interest in the property, subject to retention by the vendor of a 1% net smelter royalty if the Company commences commercial production on the claims. The Company has the option and right to purchase and cancel 100% of the net smelter royalty at any time for \$1,000,000.

On December 22, 2011, the Company signed a property option agreement with each of Wedona Resources Inc., a private corporation, and Clydesdale Resources Inc. (collectively the "Optionees"), a public company (together, the "Agreements"), whereby the Optionees each can earn a 50% interest in the Mountain of Gold property by incurring \$250,000 in exploration expenditures and paying cash of \$125,000 (or in Clydesdale Resources Inc.'s case, capital stock of equivalent value) over a three year period until December 31, 2013. The Company received \$25,000 relating to the agreement. During the year ended April 30, 2016, the Company received notification that the optionees had decided not to complete the option agreement.

(b) Pageland Minerals, South Carolina

Pursuant to a mineral property option agreement dated June 24, 2010, the Company was granted an option to acquire a 70% undivided interest in mineral claims in South Carolina. In order to keep the option granted to the Company in good standing, the Company is obligated to:

**Management Discussion & Analysis**  
**April 30, 2016**

**Financial Instruments**

(a) Fair Values

Assets and liabilities measured at fair value on a recurring basis were presented on the Company's statement of financial position as at April 30, 2016 as follows:

	Fair Value Measurements Using			Balance, April 30, 2016 \$
	Quoted prices in active markets for identical instruments (Level 1) \$	Significant other observable inputs (Level 2) \$	Significant unobservable inputs (Level 3) \$	
Cash	1,530	–	–	1,530

The fair values of other financial instruments, which include amounts receivable, loan receivable, accounts payable and accrued liabilities, amounts due to related parties, and notes payable, approximate their carrying values due to the relatively short-term maturity of these instruments.

(b) Credit Risk

Financial instruments that potentially subject the Company to a concentration of credit risk consist primarily of cash. The Company limits its exposure to credit loss by placing its cash with high credit quality financial institutions. Amounts receivable consist of accrued interest from loan receivable and GST refunds due from the Government of Canada. The carrying amount of financial assets represents the maximum credit exposure.

(c) Foreign Exchange Rate and Interest Rate Risk

The Company is not exposed to any significant foreign exchange rate or interest rate risk. The Company has transactions in US dollars, and a 10% change in foreign exchange rates would not have a material effect on foreign exchange gains or losses.

(d) Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company currently settles its financial obligations out of cash. The ability to do this relies on the Company raising equity financing in a timely manner and by maintaining sufficient cash in excess of anticipated needs.

(e) Price Risk

The Company is exposed to price risk with respect to commodity prices. The Company's ability to raise capital to fund exploration and development activities is subject to risks associated with fluctuations in the market price of commodities.

**Capital Management**

The Company manages its capital to maintain its ability to continue as a going concern and to provide returns to shareholders and benefits to other stakeholders. The capital structure of the Company consists of cash and equity comprised of issued share capital, share-based payment reserve, and equity portion of convertible debenture.

The Company manages its capital structure and makes adjustments to it in light of economic conditions. The Company, upon approval from its Board of Directors, will balance its overall capital structure through new share issues or by undertaking other activities as deemed appropriate under the specific circumstances.

The Company is not subject to externally imposed capital requirements and the Company's overall strategy with respect to capital risk management remains unchanged from the year ended April 30, 2015.

### **Legal Proceedings**

The Company is not involved in any legal proceedings.

### **Management's Report on Internal Controls over Financial Reporting**

In connection with National Instrument ("NI") 52-109 (Certification of Disclosure in Issuer's Annual and Interim Filings) adopted in December 2008 by each of the securities commissions across Canada, the Chief Executive Officer and Chief Financial Officer of the Company will file a Venture Issuer Basic Certificate with respect to the financial information contained in the consolidated financial statements and respective accompanying Management's Discussion and Analysis.

The Venture Issuer Basic Certification does not include representations relating to the establishment and maintenance of disclosure controls and procedures and internal control over financial reporting, as defined in NI 52-109. For further information the reader should refer to the Venture Issuer Basic Certificates filed by the Company with the Annual Filings and with the Interim Filings on SEDAR at [www.sedar.com](http://www.sedar.com).

### **Subsequent Event**

On May 20, 2016, the Company entered into an Asset Purchase Agreement with Pancontinental Gold Corporation ("Pancon"), Appalachian Resources LLC ("Appalachian") and Pageland Minerals Inc. ("Pageland"), pursuant to which the Company will sell and assign all mineral leases associated with its Jefferson Gold Project to Pancon. Consideration per the terms of the agreement is as follows:

- Payment by Pancon of \$30,000, of which \$21,500 is paid to the Company and \$8,500 is paid to Pageland (received);
